Currently storage of electrical energy in Australia consists of a small number of pumped hydroelectric facilities and grid-scale batteries, and a ...

Energy Vault has secured a pivotal Long-Term Energy Service Agreement (LTESA) for its Stoney Creek Battery Energy Storage System (BESS) project in New South Wales, Australia, ...

The project entails an investment of A\$350m (\$220m) and is among the largest eight-hour long-duration battery systems in Australia. It will provide ...

Acen's project, the first pumped hydro project to secure a Long-Term Energy Service Agreement under the NSW Energy Roadmap, is proposed at 800 MW of energy generation capacity ...

Opening in May 2025, the sixth round focused on supporting long-duration energy storage. It sought proposals with durations of eight hours or longer, targeting 1 GW or at least 8 GWh of new capacity.

The Iberdrola Group is making progress in its drive for electrification in Australia with two new energy storage milestones in the state of New South Wales.

This project is a key part of Energy Vault's "Own & Operate" growth strategy, reinforcing its commitment to delivering sustainable, long-duration energy storage solutions that support Australia's energy ...

With an investment of over \$700 million, the WESS will be one of the largest energy storage systems in Australia, capable of providing vital grid ...

The New South Wales government in southeastern Australia has granted priority status to two large-scale pumped hydro projects, providing long-duration energy storage (LDES) to strengthen ...

Australia long-term energy storage project

NSW has taken another significant step towards meeting its ambitious targets for new energy storage infrastructure, with ASL announcing that six new long-duration storage (LDS) battery ...
