China has established itself as a dominant force in Africa's mining sector, with a strategic focus on securing essential resources for its ...

After previously partnering with France, Morocco is now deepening its ties with China through an ambitious project to build the continent's first ...

Morocco is set to make history as the host of Africa's first battery gigafactory, backed by a landmark \$5.6 billion investment from China. The ...

Two African nations, the Democratic Republic of the Congo (DRC) and Zimbabwe, are tightening control over critical battery metals--cobalt and lithium--affecting China's electric vehicle supply chain. The ...

In Kenitra, Morocco, a \$5.6 billion investment deal between Morocco and Chinese battery giant Gotion High-Tech is set to transform Africa's role in the global clean energy transition. ...

With the global shift to electric vehicles (EVs) accelerating, China is cementing its dominance over the lithium supply chain by pouring investment ...

This project will become the largest single battery energy storage power station in Africa, injecting new vitality into the development of the energy ...

A report shows that Africa has emerged as the world's fastest-growing solar market even as global growth slowed last year, driven by a 60% surge in imports of solar panels from China.

The continent's mineral wealth extends beyond cobalt, with several African nations dominating production of other battery-critical materials.

Combined with our market analysis, we were able to identify the three most promising manufacturing steps

China-Africa battery pack

for African countries: refining, cell manufacturing, battery pack assembly
