-----

This is an integrated district dataset which is main from Chong Aih's MSc project, accessible on Github [1]. This open dataset contains hourly load, market price ...

Benton PUD is a public utility district in south-central Washington with headquarters in Kennewick. Benton PUD will use four 1-kW storage devices to help with integration of wind resources, and will ...

Stanford created a massive Thermal Microgrid of the entire campus (180 buildings), thus reducing by 80% CO2 emissions, by 15% water use and up to \$420 million of total energy savings ...

By 2035, microgrids are envisioned to be essential building blocks of the future electricity delivery system to support resilience, decarbonization, and affordability.

SMUD's novel microgrid field demonstration linked natural gas-fueled, internal combustion engines with a solar photovoltaic system. The first phase of the project involved confirming the proposed size of ...

This Smart Neighborhood project includes the construction of a microgrid facility about half a mile from the neighborhood entrance -- a 14-acre plot with 3 acres ...

The work began in 2008 as a project to install a high-efficiency, 100% renewable energy-powered, single-building microgrid. Since then, the project has expanded into an installation-wide ...

Seven EPIC-funded microgrid projects funded in 2015 recently concluded their three-year implementation timelines. These seven projects demonstrated low-carbon-based microgrids for ...
