OverviewEU solar energy strategyPhotovoltaic solar powerConcentrated solar powerSolar thermalOrganisationsSee alsoSolar power consists of photovoltaics (PV) and solar thermal energy in the European Union (EU). In 2010, the EUR2.6 billion European solar heating sectors consisted of small and medium-sized businesses, generated 17.3 terawatt-hours (TWh) of energy, employed 33,500 workers, and created one new job for every 80 kW of added capacity.

As part of the REPowerEU plan, in May 2022 the Commission adopted an EU solar energy strategy, which identifies remaining barriers and ...

Solarpower Europe launched a new EU27 country level solar target database. It allows to discover how much solar each EU ...

More than half of EU countries either have no coal power or a share below 5% in their power mix. Accelerated clean flexibility and smart electrification are needed to sustain solar growth.

Ranking of EU Countries by Installed Solar PV Capacity (2024). Europe's rural regions present significant opportunities for solar energy ...

Wind and solar overtook fossil fuels in the European Union's power generation last year, a report has found, in a "major tipping point" for clean energy.

The EU is "rapidly" moving towards a clean energy future, but experts warn our "outdated" grid is holding us back. Wind and solar generated more EU electricity than fossil fuels for ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the ...

Since then, the European Union's solar capacity surpassed 100 GW in 2018 and reached the 200 GW

EU countries on solar power generation

milestone in 2022. It exceeded 260 GW in 2023, and the growth trend is only expected to continue.

Find the most up-to-date statistics about the solar photovoltaic industry in Europe
