Explore the fascinating journey of solar energy from its ancient beginnings to its modern applications and future potential. Discover how ...

Shuman built the world's first solar thermal power station in Maadi, Egypt (1912-1913). Shuman's plant used semicircle shaped troughs to power a 60-70 horsepower engine ...

Long before the first Earth Day was celebrated on April 22, 1970, generating awareness about the environment and support for environmental ...

The world's first solar power station was built before World War One, created by a man with a vision for cleaner air. The early 1900s ...

The system ran on a hybrid supply of solar thermal and solar PV power. It was also the first instance of building integrated ...

At the International Space Station, astronauts begin installing solar panels on what will be the largest solar power array deployed in space. Each "wing" of the array consists of 32,800 solar ...

While today's solar farms boast cutting-edge technology and immense scale, the story of solar energy begins modestly, with the construction of the first solar farms several decades ago. ...

As the invention was brought out it made solar cells as a prominent utilization for power generation for satellites. Satellites orbit the Earth, thus making ...

From the earliest days of solar-powered satellites to modern rooftop arrays and utility-scale solar farms, this is the complete history of solar energy--and a look at its exciting ...
