In 2Q25, shipments reached 136.78 GWh, surpassing 4Q24 and setting a new all-time high. In 1H25, industry concentration remained high, with CR10 reaching 91.2%, roughly the same as ...

Commissioned EV and energy storage lithium-ion battery cell production capacity by region, and associated annual investment, 2010-2022 - Chart and data by the International Energy ...

Supply chain problems related to raw materials pose a significant obstacle for the Battery Energy Storage System (BESS) market, especially for ...

This report provides a detailed analysis of lithium-ion energy storage product shipments in these regions for 2024, categorized by major countries.

J.P. Morgan's recent analysis shows that shipments of stationary energy storage batteries will rise by 50% in 2025 and 43% in 2026. This surge is ...

In 2025, the global shipment of energy storage batteries surged by 82.9% year-on-year, reaching 640GWh. Institutions predict that the global lithium battery shipment growth rate will exceed ...

Global energy storage battery shipments hit 142 GWh in 2023, but here's the kicker: 78% of that capacity went to just three regions. Let's unpack where the action's happening and why it matters for ...

In the utility-scale sector, the top five suppliers are CATL, EVE Energy, Hithium, REPT, and BYD. The top two predominated, with CATL ...

Almost the entire global production of battery components took place in East Asia, with China being the main supplier and South Korea and ...
