The San Jos#233; power station was one of Guatemala's leading electricity producers from 2000 to 2020, supplying 120 MW to Guatemala's national energy grid under a long-term contract with state ...

Open map of the world's electricity, telecoms, oil, and gas infrastructure, using data from OpenStreetMap.

In accordance with Article 2 of the TPNW, Guatemala submitted a declaration to the UN secretary-general on 28 December 2022 confirming that it does not own, ...

These data can be visualized by applying filters by technology (no coverage, 2G, 3G, 4G, 4G+, 5G) over a configurable period (only the last 2 months for example). It's a great tool to track the deployment of ...

Toshiba said its decision to exit the project was in line with its policy &quot;to eliminate risk from the overseas nuclear power business, particularly from ...

We discuss the current use of all wireless technologies in NPPs with their key features. Consequently, we investigated several NPP use cases in which 5G offers potential advantages but ...

Explore how 5G base stations are built--from site planning and cabinet installation to power systems and cooling ...

This page lists operating, under construction, and permanently shut down nuclear power stations. Note that most nuclear power stations operate more than one nuclear reactor. For more information on the construction/commission/decommission dates of individual reactors at power stations, see the List of commercial nuclear reactors. The list is based on figures from PRIS (Power Reactor Information System) maintained by International Atomic Energy Agency

Explore how 5G and LTE networks are enhancing safety, automation, and cybersecurity in nuclear power
