-----

Guinea-Bissau has huge potential for clean energy development, but these energy resources are undeveloped due to inadequate financial, regulatory and technical capacities.

Guinea-Bissau has plugged into a regional power grid shared with its neighbours. The new hydropower link is expected to end chronic blackouts in the capital and energise the fragile ...

The government of Guinea-Bissau has recognized renewable energy --particularly solar--as a priority for rural development. Though formal policies are evolving, donor-led programs are accelerating ...

The aim of this article is to present an energy plan for Guinea-Bissau based on the OMVG transmission network in the country and the integration of a photovoltaic plant at the Bissau ...

Energy poverty in Guinea-Bissau is very high. In fact, half of the country, more than a million people, are still unable to access electricity. As of 2023, only 0.8% of the country had access ...

Guinea's hydropower plants (Kaleta and Souapiti) now supply clean energy domestically and export 1,174 GWh annually to Senegal, The Gambia, and ...

This series of workshops aims to share with public institutions, the private sector, and civil society the various strategic guidelines for developing a viable, reliable, and sustainable national ...

The new solar and storage project will help solve Guinea-Bissau's energy crisis by providing clean and reliable electricity to millions of people who previously had no access to it.

To increase low-carbon electricity generation, Guinea-Bissau can look to regions that have successfully expanded their clean energy capacity, especially focusing on solar and nuclear power.
