Ireland's Climate Action Plan 2024 (CAP 24) includes a target to increase the share of electricity generated from renewable sources up to 80% by 2030. The ...

A deep dive into Ireland's plan to increase its solar power capacity by 800%. We explain the 8GW target, the grid challenges, and what it means for your home.

Dublin, 13 November 2025 - Ireland celebrated a landmark moment in its clean energy transition, with national solar capacity surpassing 2 GW for the first time. This milestone reflects the remarkable ...

Ireland's grid operators curtailed nearly 89 GWh of solar power in the first half of 2025, highlighting the scale of Ireland solar curtailment 2025 and how fast capacity has expanded, ...

Despite the promising growth, Ireland currently remains well behind its 2030 target of 8 GW of installed PV. Its total installed solar capacity was 1.76 ...

Ireland now has a total solar capacity of 1,185MW with as much as 373MW coming from domestic rooftops - producing ...

According to Ireland's Climate Action Plan, during 2025 the country should have "up to 5 GW" of solar capacity. The phrase "up to" may leave some wiggle room, but the target also calls for "at least 1 ...

Ireland has reached 2GW of solar power. Encom explains what this milestone means for homes and businesses in 2026 and how the EUR1,800 SEAI grant supports new installs.

During the first six months of 2025, 88.725 GWh of solar was curtailed in the Irish Single Energy Market (ISEM), according to a report by Montel Energy, which looks at renewable energy curtailment in both ...

How much solar power is limited in Ireland

With 130 MW of capacity, it generates enough clean electricity to power more than 29,000 homes each year -- a powerful symbol of how Ireland is scaling solar to meet climate and energy goals.
