Open5GS is a C-language implementation of 5G Core and EPC, i.e. the core network of NR/LTE network (Release-17)

Base station operators deploy a large number of distributed photovoltaics to solve the problems of high energy consumption and high electricity costs of 5G base stations.

Huawei 5g base station for communication and solar Huawei's 5G Power is a next-gen site power solution designed to create a simple, intelligent, and green telecom energy network.

CellMapper is a crowd-sourced cellular tower and coverage mapping service.

Fast variation of the user load and beamforming techniques may cause large fluctuations of 5G base stations field level. They may be underestimated, resulting in compliance of base stations not fitting ...

First, on the basis of in-depth analysis of the operating characteristics and communication load transmission characteristics of the base station, a 5G base station of ...

NR-Scope is a 5G wireless network telemetry tool for 5G Standalone network measurement and performance optimization. NR-Scope decodes DCI, SIB and ...

1. This study integrates solar power and battery storage into 5G networks to enhance sustainability and cost-efficiency for IoT applications. The approach minimizes dependency on traditional energy grids, ...

This showcase of multi-type terminals in sea scenarios demonstrates the service capabilities of the 5G NTN network. 5G NTN technology seamlessly combines cellular and satellite communication ...
