About Dataset Solar-based energy is becoming one of the most promising sources for producing power for residential, commercial, and industrial applications. ...

Participants are required to use the provided dataset to analyze, visualize, and predict solar energy generation and weather patterns. The goal is ...

The NASA POWER project's Data Access Viewer (DAV) is an interactive web-mapping application providing access to NASA solar and meteorological data.

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download ...

Use our interactive map to explore irradiance anomalies, La Niña effects, and regional solar generation trends worldwide. Explore global solar irradiance ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well ...

Learn how to read your solar monitoring app, track performance, interpret usage stats, and catch system issues early to maximize your solar savings.

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

Map services and data downloaded from the U.S. Large-Scale Solar Photovoltaic Database are free and in the public domain.
