Explore Eaton's high-voltage inverter converts direct current (DC) from the batteries or generator to alternating current (AC) to power the traction drive motors.

It converts Direct Current (DC) from the battery to Alternative Current (AC) to power the electric Motor. It can also be used in reverse mode to charge ...

The 275kW high power CPS three phase string inverters are designed for ground mount applications. The units are high performance, advanced and reliable ...

Viper is the first 800-Volt inverter to use an innovative, double-side cooled silicon carbide (SiC)-based power switch that delivers the higher power densities and ...

Experience the pinnacle of electric vehicle performance with our state-of-the-art inverters for e-axes. Our advanced technology maximizes energy efficiency, delivering unparalleled power to propel your ...

Recognizing this trend, Punch Powertrain has developed the IV5--a cutting-edge 800V high-power inverter. This product leverages the company's ...

Our Silicon Carbide inverter has the highest frequency switching rate that is currently possible and is 800V compatible. This means faster power transfer and a lighter system compared to 400V inverters.

Designed for 800V-capable drive systems, the new power electronics sets the bar high in terms of efficiency and performance Measurements have shown that the ...

Higher voltages, up to 800V AC, make the whole system more efficient, especially with string inverter architecture where the cables between the inverters and MV/LV transformer are usually very long.

The R-Series inverter is a compact, efficient and ISO26262 ready inverter. The product is a perfect fit for

Inverter 800V voltage

multiple HV applications such as eBus, commercial vehicles, marine or hybrid systems.
