The government of Jordan targets 10% of energy mix to come from renewables by 2020. The country has set up a fund, as well as duties and taxes exemptions on all manufactured locally and imported ...

Electricity Production in Jordan reached 22,458 GWh in Dec 2024, compared with 21,206 GWh in the previous year. See the table below for more data. Explore the most complete set of 6.6 million time ...

Official and up-to-date data of Jordan for all years of statistics, in an easy-to-read format. Analysis of electricity generation with advanced tools for comparisons, trends, shares, and various metrics.

AMMAN -- Electricity generated from natural gas in Jordan dropped to 58 per cent in 2024, compared with 61 per cent in 2023, while renewable ...

Explore data sources and methodology for electricity generation statistics in Jordan. Compare yearly, monthly, and rolling 12-month data sources.

In this paper, the status of the electricity supply system and renewable energy resources in Jordan are discussed.

Natural gas is increasingly being used to fulfill the country"s domestic energy needs, especially with regard to electricity generation. Jordan was estimated to have only modest natural gas reserves (about 6 billion cubic meters in 2002), but new estimates suggest a much higher total. In 2003 the country produced and consumed an estimated 390 million cubic meters of natural gas. The primary source is located in t...
