We're committed to increasing solar energy in Tonga. There are roofs all over the islands that could become renewable energy generators, and a huge opportunity for growing solar for our community.

Tonga is making tangible progress toward its renewable energy targets with the rollout of solar-powered mini-grid systems across its outer ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...

More data is needed to understand when, why, and what volumes of solar panels are reaching end of life, but weather damage and installation errors are ...

Thinking of adding solar panels to your shipping container? Learn key considerations, how many panels fit on 20ft and 40ft containers, plus tips and ...

The policy aimed to improve energy security of Tonga while contributing to the reduction of global green-house gas (GHG) emissions. A number of studies and implementation of solar energy technologies ...

In Micronesia, Yap island seeks bids on a 79 kW solar plus storage minigrid system. A new hybrid minigrid that will provide clean, reliable and efficient ...

Tonga Energy Road Map 2010 launched as a 10-year plan focused on reducing Tonga's vulnerability to oil price fluctuations and improving access to modern energy services, and achieving environmental ...

We currently have a fully functioning Independent Power Producer solar system from Singyes Solar, with a capacity of 2MW. Singyes owns, generates and ...
