With over 40 years of experience in the surveillance industry, LILIN integrates AIoT applications, edge computing, and security equipment into a total solution for cross-industry applications.

LILIN utilizes AI and vision technologies to recognize mask wearing behaviour, to detect social distance, and to calculate the capacity of a building for limiting people density.

The LILIN 4K AI YOLO camera has multiple behavior modes, which can be easily paired with AI recognition for various applications, such as license plate detection or face detection.
