"The launch of the Kaliningrad Gigafactory is an industrial breakthrough for Russia and a huge contribution to the foundation of national ...

This ambitious announcement followed Russia's capture of the Shevchenko settlement in Ukraine's Donetsk region, home to one of Ukraine's ...

Until now, Russia had relied on lithium imports from Chile. Rosatom plans to complete the production cycle with the help of two new "gigafactories," one in ...

Rosatom's Fuel Division, managed by TVEL, has launched pilot production at Russia's first lithium-ion energy storage factory, "gigafactory" in the Kaliningrad Region. The facility marks a ...

The facility marks a major step toward ensuring Russia's technological independence in advanced energy storage technologies. With an annual production capacity of 4 gigawatt-hours, the ...

The largest Russian plant for producing lithium-ion batteries with a design capacity of 4 gigawatt hours per year is being built by Renera, a division within Rosatom.

With an annual production capacity of 4 gigawatt-hours, the gigafactory is the country's only large-scale facility producing lithium-ion batteries. It covers the full production cycle, from cell ...

The plant for the production of lithium-ion cells and energy storage systems - the "Russian gigafactory" - will operate at the site of the Baltic NPP as early as 2026. The construction of the facility will ...
