The project will finance Mauritania's first large-scale battery energy storage facility, enabling the country to harness its abundant solar and wind resources for more reliable electricity.

This project is located in Mauritania, Africa, providing an integrated power solution for local communication base stations. A total of 7 sets of equipment have been installed.

This project addresses power supply challenges for telecommunication base stations in Mauritania. It delivers a flexible, reliable energy solution in off-grid ...

The Mauritania Large Electricity User Energy Storage Project represents more than just batteries - it's about enabling industrial growth while embracing renewable energy.

This project is designed for communication base stations in Mauritania, addressing the power supply issues of these stations. In off-grid environments, it provides a flexible and reliable energy solution by ...

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply.

The project will be implemented in Kayes Region in Mali and will benefit about 500 000 people, including 20 000 households in the 50 localities that will be connected to the network.

The project will establish a 1,373-kilometer high-voltage power line, with a transit capacity of 600 megawatts (MW) between the two countries, and ...

ISO-certified processes with circular economy focus. Localized solutions across 3 West African nations. From
