Villages in Myanmar are taking electricity generation into their own hands, turning to solar micro-grids to power their homes. One of the solar pioneers in the country ...

In 2019, the government announced plans to build two solar energy plants--in Myingyan and Wundwin in Mandalay Division --each to have a generation capacity of 150 MW.

Myanmar's surging solar imports mirror a trend of increased solar adoption to escape erratic power supply in lower- and low-middle income ...

Working with its local partners, UNICEF installed a climate-resilient solar pump system, upgraded the boreholes, set up a new water tower, and laid a piped distribution network connecting ...

Amidst a deepening energy crisis exacerbated by political instability since the 2021 military coup, Myanmar is increasingly turning to solar power to meet its critical electricity demands. ...

That changed when UNICEF, through critical funding from the OCHA-managed UN Global Emergency Fund (CERF), helped install a fully solar-powered water system bringing clean, ...

In one of Myanmar's driest regions, where extreme heat and deep groundwater have long driven water insecurity, the impact was immediate. Families no longer queue in the heat.

Just as the government is implementing various electricity generation projects, entrepreneurs from the private sector can also establish small-, medium-, and large-scale solar ...

Of the total 60,000 solar panels planned for installation, approximately 40,000 have already been installed, and the remaining 20,000 will be installed by the end of February. The Shwe ...

Myanmar families install solar power generation

For the 248 local families in the Kan Byin community, the solar mini-grid now lights up their homes for their children to study, has improved refrigeration to keep ...
