---

Berkeley Lab collects, cleans, and publishes project-level data on distributed\* solar and distributed solar+storage systems in the United States. The data are ...

The National Center for Photovoltaics (NCPV) at NLR develops photovoltaic technology innovations to improve performance, reduce costs, and advance manufacturing capabilities. The ...

The United States installed approximately 14.1 gigawatt (GW)-hours (4.3 GW alternating current [GW ac]) of energy storage onto the electric grid in ...

Arizona and California follow, each accounting for roughly 6% of the national total. Notable projects driving this trend include the Tehuacana Creek 1 Solar facility in Navarro County, Texas, ...

The U.S. energy storage market delivered a record-breaking quarter in Q3 2025, installing 5.3 GW nationwide and pushing year-to-date additions ...

Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more than two decades ...

The PV facility records are collected from the U.S. Energy Information Administration (EIA), position-verified and digitized from aerial imagery, and checked for quality. EIA facility data are supplemented ...

An efficient, modular, and scalable solution can be achieved by storing energy in the form of high-temperature heat and then extracting energy, on demand, using thermophotovoltaic (TPV) cells to ...

With a planned photovoltaic capacity of 690 megawatts (MW) and battery storage of 380 MW, it is expected to be the largest solar project in the ...

# National Photovoltaic Energy Storage Record

Companies Procure Record Levels of Solar and Storage Data from SEIA's annual Solar Means Business report show that major U.S. corporations, including Meta, Amazon, Google, Apple, and ...
