JAKARTA - The global electric vehicle industry is entering a new phase as Chinese automakers begin introducing all-solid-state battery technology, claimed to provide a driving range of ...

Donut Lab released independent testing of its new solid-state battery, which can charge to 80 percent in just five minutes.

At CES, Donut Lab presented a solid-state battery allegedly ready for mass production. However, the impressive specifications prompted critics to question the results. Donut has now ...

Solid-state batteries are getting a lot of buzz around the world, but India is still working to catch up. Research centers and companies are starting to explore this technology.

Donut Lab's solid-state battery sure looks like the savior for electric cars.

Chinese battery manufacturers already account for well over 50% of the global market, but new battery types, including solid-state, are rolling out, promising to be safer, more efficient, and safer.

A new solid-state battery cell from Donut Lab, a Finnish company, has been certified with charge times of less than 10 minutes.

India explores solid-state batteries for EVs, aiming for safer, faster, and more efficient electric transportation in the near future.

Solid-state batteries spark a global EV arms race as automakers and startups compete to unlock ultra-fast charging and the holy grail of electric mobility.

Interest has been swirling since Donut Lab, a Finnish company, announced last month that it had a new solid-state battery technology, one that was ready for large-scale production.
