This program is designed to encourage residents to install their own clean energy systems, particularly battery storage. The Self-Generation ...

Energy from a source such as sunlight is used to lift a mass such as water upward against the force of gravity, giving it potential energy. The stored potential energy is later converted to electricity that is ...

You might think that free energy devices are nothing more than science fiction, but the potential for them to revolutionize the way we generate and use energy is very real. In this article, we ...

The need for long-duration energy storage, which helps to fill the longest gaps when wind and solar are not producing enough electricity to meet ...

This new free, free and infinite energy generator is made with microwave transformers and a 220v motor, and doubles the power of its previous model. We have also added a rotor with a...

Could free energy change the world--and has it already been discovered? Dive into the buried science, vanished inventors, and economic empires at stake.

Discover the innovative world of electromagnetic power generators, a sustainable, fuel-free energy solution harnessing the ...

When combined with a federal tax credit, the program's financial incentives are designed to cover the full cost of installation. The CPUC's Self-Generation Incentive Program (SGIP) provides incentives to ...

This pilot, now closed to new applicants, provides financial incentives to new home developers for the installation of energy storage systems on new single-family or multi-family residential housing ...
