Peak Energy's sodium-ion phosphate pyrophosphate (NFPP) battery storage system was unveiled in July and is now running at the ...

Moonwatt launches a modular sodium-ion BESS for hybrid solar plants, featuring passive cooling, distributed string architecture, and DC-coupled integration.

Salzstrom has unveiled a sodium-ion energy storage system for use in commercial applications. Salzstrom had previously launched a residential photovoltaic storage system ...

A surprising breakthrough could help sodium-ion batteries rival lithium--and even turn seawater into drinking water. Scientists discovered that keeping water inside a key battery ...

Sodium-ion batteries are emerging as a cost-effective option for hybrid solar power systems, offering stable performance with less lithium dependence.

A new, large scale iron-sodium energy storage system will be manufactured in the US, helping to support more wind and solar in the grid.

Sodium-ion batteries may be the answer to the future of sustainable energy storage and could be used to make drinking water out of seawater.

Peak Energy has already deployed what it calls the first passively cooled, grid-scale sodium-ion system in Colorado. The company says the design could save over \$100 ...

The company formed in 2024 as Emtel Energy USA and today launched its new brand. Syntropic Power systems do not use lithium, instead turning to sodium-ion designs ...
