OX2 has sold its 50MW/110MWh battery energy storage project in Uusnivala, Finland, to the L& G NTR Clean Power Fund. The project will help regulate grid frequency and stability and ...

It is expected to be completed by the end of the first quarter of 2025. Nordic Solar noted in the statement that it plans to increase the ...

In this context, the EU-funded Air4NRG project aims to improve long-term energy storage. Specifically, it targets over 70 % round-trip efficiency, sustainability, and integration ...

The project is lead by CEE (DTU Elektro) with DTU Wind Energy, Vestas and DEIF as partners. The project will develop, test and optimize hybrid energy storage systems, i.e. combinations of ...

BOS Power and HiTHIUM sign a 3GWh battery energy storage agreement to support renewable projects across the Nordic region, ...

Furthermore, the project applies a system analytical approach to anticipate the environmental, economic, security, and societal consequences, while the software tools aim to set up and ...

This Northern Europe project implements a large-scale containerized energy storage solution to support utility-scale energy storage and grid stability. ...

HAVEN is innovating energy storage systems by developing a Hybrid Energy Storage Solution (HESS) that can store energy for long periods and provide multiple grid support services.

In this paper, a case study of electrical energy storage utilization in hydrogen production is conducted in the Nordic context, with a high share of wind production. The ...
