-----

The report communicates our shared perspective on key development trends in the power system and strategies to address emerging challenges. It also provides a status update on ongoing and planned ...

Nordic container energy storage system manufacturers are leading the global shift toward modular, scalable energy solutions. This article explores their innovative approaches, market trends, and why ...

The Nordic energy storage container sector has grown 42% since 2020, driven by Europe's push for carbon neutrality. These modular systems solve critical challenges in renewable energy adoption - ...

They're trying to build a new kind of nuclear industry-- clean, portable, subscription-based, and faster than a diesel plant to deploy. If the ...

Clean, cheap, safe and abundant energy using thorium. Enough for everyone and forever.

Norwegian energy and nuclear project developers have joined their forces to explore an innovative maritime solution that includes building floating ...

Designed and built in Norway Our EPODs are manufactured in Norway according to Norwegians rules and regulations, designed for environmental sustainability and ...

The idea is to build relatively small units - the size of a standard container - with an output of around 100 megawatts. These modules are to run ...

Launched by a pilot project named "PowerFlex", we set out to design and implement low-cost and flexible shore power supply for container ships that included onboard battery charging in the system ...

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW ...
