London-listed Oracle announced this week that it had begun a grid interconnection study for the proposed project in Jhimpir, Sindh Province, ...

The Pakistani government has added two large-scale solar power projects, totalling 2,800 megawatts, to its 2025-2035 Indicative Generation Capacity Expansion Plan (IGCEP), Daily Times ...

Quaid-e-Azam Solar Park is Pakistan's first utility-scale solar farm linked to the national power grid. It is located in the Cholistan desert near Bahawalpur City in the Punjab province.

The study is a key step towards integrating the plant's 800MW solar and 500MW wind power generation, with an additional 260MW BESS, into the national grid.

Pakistan has become one of the biggest new solar markets. It's bringing cheap, clean power but analysts warn of potential trouble ahead.

The proposed projects, located in Jhang and Muzaffargarh, are expected to be developed with Saudi energy firm ACWA Power under a possible government-to-government agreement.

The National Grid Company of Pakistan Limited (NGC) has notified the Private Power and Infrastructure Board (PPIB) about the inclusion of two projects with capacities of 1,000 MW and 1,800 ...

The National Grid Company of Pakistan Limited (NGC) recently informed the Private Power and Infrastructure Board (PPIB) that land has been ...

Pakistan's solar boom grows out of a decades-long power sector crisis, which has caused many Pakistanis to lose faith in the state's ability to consistently provide reliable electricity....
