THE Department of Energy (DoE) said it will require developers with proposed renewable energy (RE) plants generating at least 10 megawatts (MW) to pair them with energy storage systems ...

The new capacity includes output from 12 renewable energy projects, one oil-fired facility and one natural gas plant. Most of these began ...

The projects comprise a 40-MW battery energy storage facility at the Binga Hydroelectric Power Plant (Phase 2) and another 40-MW system at the Ambuklao Hydroelectric Power Plant.

The project is expected to generate 3,500 megawatts-peak (MWp) of solar power once development is fully complete. "Once synchronization is completed, the plant can begin supplying ...

As a trailblazer in battery energy storage technology in the Philippines, San Miguel Global Power is able to significantly support the use of renewable energy ...

Aboitiz Power Corp. is building an asset portfolio that supports the integration of renewable energy capacities through energy storage systems and other innovation-driven initiatives ...

The world's largest solar-plus-storage project has made a critical achievement that confirms system readiness and safe connection to the Luzon grid. Meralco PowerGen Corporation ...

Seeks to assess and advance PSH as a stand-alone ESS to support the country's renewable energy and grid stability goals through site identification, market assessment, and ...

Department of Energy (DOE) order sets out new rules for mandatory energy storage, including a minimum capacity of at least 20% of the generating plant's installed capacity. DOE also ...

Philippines Power Grid Energy Storage Power Station

The Department of Energy (DOE) of the Philippines endorsed 17 power generation projects to the National Grid Corporation of the Philippines (NGCP) in June 2025, highlighting the ...
