All Solar PV projects installed in NYC require construction and electrical permits issued by NYC DOB. Project specifics may require other filing and license requirements.

Most residential solar projects don't require federal permits. Less than 5% of wind and solar projects need federal Environmental Impact Statements or similar ...

It applies to all public utility solar energy projects over the CA cost threshold and any non-utility solar energy project with a capacity of 100 megawatts (MW) or greater.

The goal of SB 379 is to streamline permitting for solar energy systems to ease the development of solar energy and storage projects in the state, thereby contributing to larger efforts that help California ...

Before we dive into permits and paperwork, let's address the elephant in the room: Why bother with energy storage? Imagine your power grid is a college student's fridge - sometimes overflowing with ...

The checklist is available on the MPSC Renewable Energy and Energy Storage Facility Website. Staff may make non-substantive changes to this document over time to best accommodate ...

Recently, the world's largest photovoltaic (PV) and energy storage project was awarded to a consortium including several Chinese companies. The USD6 billion project in ...

Do the size thresholds reflect typical projects in your community? Is the use table and permitting tiers based on project size, zone, and use workable and clear?

Permits are required for the installation of all building-connected solar energy systems. There are several options for filing solar energy projects at the Department of Buildings. Projects may be filed ...
