The subset of respondents now must report monthly accounts for about 90% of photovoltaic (PV) activity in the United States, based on 2021 data. Data collected on both the ...

Indonesia will defend its solar panel exports after the US imposed provisional duties of up to 143% in an anti-subsidy probe.

JAKARTA, KOMPAS - The United States government has imposed a temporary anti-subsidy tariff on imports of solar cells and modules from Indonesia, India, and Laos. For Indonesia, this policy ...

Subsidized mass production of Chinese solar panels drove down the global price and drove nearly all of the first generation of U.S. and European solar panel makers out of business.

98% of PV shipments were mono c-Si technology, with 58% TOPCon. Margins for the leading PV wafer, cell, and module manufacturers continued to decline through Q1 2025, due to ...

The cell number is important because it signals that domestic solar panel manufacturers are ramping up production, and perhaps the majority of installed solar panels in the United States will ...

The global PV market faces uncertainty amid fluctuating module prices and evolving energy policies. Changes to Chinese export taxes may ...

NLR conducts detailed supply chain analysis for specific photovoltaic module technologies. These analyses include production locations, supply chain risk and costs, and material ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel ...

India's largest solar panel exporter said the duty applies to made-in-India cells, while Waree sources cells

Photovoltaic panel exports are weak

from lower-duty regions to make and ship modules to the US.
