Please read the following safety instructions carefully before unloading and unpacking your solar modules. It is crucial to follow the outlined measures and guidelines for the safe unloading and ...

To prevent the panels from falling while removing them from the pallet, move the whole pallet next to a wall or other firm support structure, as shown below. Cut off all remaining straps and remove any ...

To ensure the safety of unloading of PV modules, please read this manual carefully. In the process of unloading, the forklift should be selected reasonably according to the size and weight of the goods.

Modules should be bolted to support structures through mounting holes located in the frame's back flanges. Refer to what is shown in Figure 6 (Mounting Details).

Canadian Solar is committed to provide high quality and high performance solar modules to assist your PV business growth. This document provides unpacking instructions to our packaging solution for ...

To ensure the safety of loading, unloading, unpacking and storage of PV modules, please read this manual carefully. When you need to unpack and install the modules, you can search and download ...

The long side of the module to unpacked needs to be close to a solid support for about 15-20cm distance, the support could be a wall, rack or another unpacked module box of the same type, and ...

These systems are meticulously designed and engineered to provide robust support for photovoltaic (PV) modules, ensuring optimal performance and durability across various solar installations.

This guide serves as a reference for inspecting, transporting, unpacking, handling and storing LONGi PV solar modules to ensure safe practices for you and the modules.

Photovoltaic panel unpacking support frame

The unloading platform should be made from sturdy, durable materials capable of supporting the weight of the solar panels, forklifts, or other unloading equipment without risk of collapse.
