To protect the DC-side input of the inverter, OBO offers a portfolio of generator connection boxes with lightning and surge protection.

With built-in lightning protection, this junction box offers superior safety and durability. The rugged design and IP65 waterproof rating make it ideal for ...

This plug-and-play solution provides surge protection for both buildings without external lightning protection, as well as with external protection. Universal ...

The box PV combiner can be mounted on any regular surface with provided mounting buckles, and no key is needed to open and close the box. Built-in with ...

The ready-to-connect ProTec PV Box 7Y is a particularly compact three-string solution that offers reliable protection against damage caused by ...

Use our lightning and surge protection for photovoltaic systems to ensure availability and your yield. String combiner boxes need to be used in order to ...

CITEL unveiled its latest GAK 12 XS series generator junction box for DC side protection of large PV installations against lightning or surge ...

The prewired DEHNcube PV system solution protects inverters and PV modules from surges. The generator junction box is available for 1 MPP, 2 MPP and 3 ...

Equip your solar panels with weatherproof junction boxes featuring lightning arresters and circuit breakers for enhanced safety and performance.

Photovoltaic power generation lightning protection junction box

With our optimized generator junction boxes, we offer optimum lightning and surge protection, especially for small and medium-sized PV systems.
