The goal of this study is to assess the environmental impacts of a novel pasture-based agrivoltaic concept: co-farming rabbits and solar PV.

In this study, we present a conceptual design for a novel agrivoltaic system based on pasture-fed rabbit farming and provide the technical, environmental and economic analyses ...

U.S. scientists have developed a new way to combine PV generation and rabbit farming. They claim their new approach to ...

Power plant details for Oregon University System Rabbit Field, a solar farm located in Corvallis, OR. View the monthly generation and consumption, generator details, and more for Oregon ...

Rabbit's Foot Solar is a major clean energy project from RWE, built to support the growing energy needs of Bowie County and the Lone Star ...

To establish the viability of rabbit-based agrivoltaics, we collected and analyzed a wide range of data, from grazing density to population growth-rates to solar economics to greenhouse gas ...
