Upgrade to a reliable solar water pump kit for wells and irrigation. This solar ...

Solar pumping system converts solar energy directly into electric energy, and then drives motors to drive water pumps to pump water from deep wells, rivers, lakes and other water sources.

A 400 watt solar panel kit with battery and inverter represents an excellent entry point into solar energy for medium-power applications. With daily ...

With a flow rate of up to 3 cubic meters per hour, this pump is suitable for small to medium-scale agricultural irrigation, domestic water supply, and livestock watering.

Its working principle involves converting solar energy into electrical energy to power the pump, which extracts or delivers water, offering an energy-efficient and self ...

The whole system is mainly composed by the solar panel, solar inverter, and solar water pump. It is the most attractive water supply means in the sun-rich areas of the world today, especially in remote ...

Featuring a convenient 1-inch output, this versatile pump is specifically designed for deep well applications and can be powered by solar energy for enhanced flexibility in remote locations.

Our low-cost ecological products are affordable for everyone, ...
