When the sun is shining, PV systems can generate electricity to directly power devices such as water pumps or supply electric power grids. PV systems can also charge a battery to provide ...

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

An overview of Clean Energy and Renewable Portfolio Standards across 50 U.S. States, with state-by-state policy progress, key resources, and ...

The paper emphasizes the importance of widespread strategy frameworks that not only encourage solar adoption but also discusses broader energy system dependencies. This study ...

In addition, several states have adopted solar multipliers, either in lieu of or in combination with set-asides, which allow generation from solar projects to receive extra credit towards meeting ...

State and local policies and regulations have encouraged greater solar PV deployment in their jurisdictions. Examples include financial incentives (e.g., tax credits, rebates), renewable ...

At the federal level, there are several key policies, programs, and regulations that impact the development of solar PV and other renewable ...

The creation of this database was jointly funded by the U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) via the Lawrence Berkeley National Laboratory (LBNL) Energy Markets ...

Linking solar FITs to high-level solar targets and a strong policy framework--As FITs often require regular revisions and price changes, it is important that FITs are linked with broader ...
