View the TI Solar charge controller block diagram, product recommendations, reference designs and start designing.

The circuit boards used for the solar MPPT (maximum power point tracking) charging, battery packs, and DC-DC power conversion to the MCU ...

With the ability to use 10 modules, you can easily customize and scale your solar lighting setup based on your specific needs. The compact design and versatile installation options make this ...

A mobile solar charger PCB board is a critical component in portable energy systems, enabling the conversion of sunlight into electrical power for charging devices on the go. These printed circuit ...

Our high-quality, custom-designed PCBs support the smooth operation of solar charge controllers, enhancing their performance, reliability, and longevity. If you ...

This is how we make a simple but effective solar battery charger with automatic cut-off, using just transistors and zener diodes, no microcontroller, no ...

This board is meant to be everything you need to power your 5V electronics: simply connect a 500mAh or larger battery to the JST PH 2-pin port, then charge it when you can from USB or DC/solar. At the ...
