Estimated small scale solar photovoltaic generation and small scale solar photovoltaic capacity are based on data from Form EIA-861M, Form EIA-861 and from estimation methods ...

Electricity generation from solar, measured in terawatt-hours.

The NREL PVDAQ is a large-scale time-series database containing system metadata and performance data from a variety of experimental PV sites ...

The Solar Power Generation Data dataset provides synchronized inverter-level AC/DC power and yield measurements together with plant-level ...

PVGIS is a free web application that allows the user to get data on solar radiation and photovoltaic system energy production, in most parts of the world.

The Solar.web Query API enables generation and consumption data from photovoltaic systems, buildings, and individual loads to be visualized in a variety ...

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

Definition: This calculator estimates the annual electricity generation of a solar PV system based on its size, local solar insolation, and system efficiency. Purpose: It helps homeowners, businesses, and ...
