We propose the following four measures to ensure the sustainable implementation of APV programs. Use economic policy levers to fund APV-compatible ...

Poverty-alleviation programs using solar energy (PAPSE) are poised to unlock unprecedented capital investments with significant potential to ...

Energy poverty is a serious problem worldwide and has attracted the attention of policymakers. As a type of social welfare project, photovoltaic poverty alleviation projects (PPAPs) ...

The PV poverty alleviation effect is stronger in poorer regions, particularly in Eastern China. Our results are robust to alternative specifications and variable definitions.

China's PV poverty alleviation policy aims to lift poor regions out of poverty and promote rural prosperity by building income-generating solar PV systems.

The results show that: (1) PVPA can significantly improve the development of village-level industrial development and human settlements, but the policy effect on promoting village governance ...

The research highlights the role of solar PV in alleviating poverty and advancing the SDGs, offering valuable insights to decision-makers seeking to ...

This analysis used tracking data from households both with photovoltaic equipment installed and without in "S Town," Jiangsu Province, from 2017 to 2021. The results indicate that ...

Here, we present a comprehensive assessment of the emission-reducing and income-increasing effects of the PVPA policy using estimated carbon emission factors and a staggered difference-in-difference ...

Solar power generation and photovoltaic poverty alleviation

Central to the poverty alleviation strategy is a two-pronged approach that aims to improve people's welfare while contributing to the province's economic growth through renewable ...
