-----

Point Lighting manufactures solar powered products and systems for heliports, wind cones & obstruction lighting. Choose from our recommended designs or link to our products by application.

The integration of solar panels into aircraft structures has enabled the utilization of solar power in onboard systems and auxiliary power units ...

Engineering Brief No. 76 provides information and guidance on using solar power supplies for airport obstruction lighting.

One of the standout features of the WLS-25 is its modular and self-sufficient solar power system. It incorporates a high-efficiency silicon solar panel, a built-in NiMH rechargeable battery ...

Aviation Renewables is the premier solar-power and LED airfield lighting expert internationally. Our goal is to get the best product in each customer's hands, based upon their ...

Solar powered aviation lights offer a reliable and sustainable solution for illuminating runways, taxiways, and other critical areas of the airfield. By utilizing solar energy, these lights ...

As global solar irradiance and solar power generation potential vary ...

With no grid connection required, solar powered aviation lights are revolutionizing aviation safety in remote locations while reducing carbon footprints. This article explores their ...

In this article we will review a study examining methods to reduce the impact of on-airfield solar upon aircraft and facilitate more renewable energy ...

The Solar powered AWL system utilizes PLP Solar technology to provide solar power generation either as a main source of power or as a back-up system. This utilizes solar modules and battery storage ...
