TAGBILARAN CITY, Bohol (PIA) -- At least seven of the 20 off-grid island barangays in Bohol are targeted to receive solar-powered microgrids by 2029 as part of efforts to transition the ...

For 20 years, SIPCOR has held a monopoly through its power supply contract with the Province of Siquijor Electric Cooperative ...

Vivant Foundation, Inc. (VFI) has brought solar power to a remote school in Palawan, advancing another step in the country's grander goal of electrifying the remaining last mile ...

We collected an energy generation and consumption dataset across 208 mini-grids in Philippine off-grid islands. We then simulate the RE transition based on prevailing technology costs ...

Solar energy is an increasingly popular power source in the Philippines, with several new projects unveiled and billions in investments ...

National Roadmap for Renewable Energy: Outlined by the Department of Energy, providing a comprehensive insight into the future of ...

The project demonstrated that hybridizing diesel-based power supply generation in small islands in the Philippines is a viable solution for off ...

Palawan's energy future is at a turning point. New microgrids, solar-powered water and health facilities, mobile solar-battery systems for disaster response, ...

On the southern Philippine island of Mindanao, the Legal Rights and Natural Resources Center (Friends of the Earth Philippines) have been working ...

Solar power generation on Philippine islands

Studies from our research group at the University of the Philippines Diliman on 600+ NPC-SPUG mini-grids and other smaller islands show that hybridizing systems can reduce generation ...
