-----

The 3,200-megawatt (MW) solar photovoltaic power plant project launched this year will soon enter its equipment phase, following the completion of the civil engineering work, said ...

A Chinese consortium comprising China International Water & Electric Corporation (CWE) and China Nuclear Industry Huaxing Construction (HXCC) ...

As the world grapples with the urgent need to transition away from fossil fuels, Algeria's massive solar power project in the Sahara desert stands as ...

The first two solar power plants under Algeria's flagship 3,200 MW renewable energy initiative are expected to come online before the end of 2025, the ...

Among them, the 233-megawatt photovoltaic project completed in 2016 was Algeria's first new energy project and also the first large-scale grid-connected ...

The addition of 3GW of solar power generation capacity over the next two years will be the first substantial shift in Algeria's gas-dependent energy mix ...

Solar power is the leading source of renewable electricity in Algeria, with a total capacity of 436.8 MW. About 388.95 MW (82.4%) is grid-connected, ...

By 2030, the country aims to reach a clean energy capacity of 22,000 megawatts. It expects to generate most of its renewable power through solar photovoltaic technology, with a ...

The projects will cover the development of five solar PV sites across five "wilayas" (provinces) for capacities from 50 to 300 MW, in addition to the ...
