At SolaraBox, we design and manufacture advanced solar containers that bring clean, reliable, and mobile energy wherever it's needed. Built for multi-industry use, our systems replace costly diesel ...

Our multi-point injection systems allow for efficient chemical distribution minimizing environmental footprint. Our solar powered pumps contribute to GHG reduction.

Each solar-powered shipping container generator is transportable, securable, and can be fully customized to your specific needs, including hybrid and microgrid ...

We are actively driving the evolution towards emission and noise compliant power solutions at worksites. The mobile solar container range redefines on-site power by harnessing the sun's energy in an ...

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

The combined use of solar and wind energy can significantly reduce storage requirements, and the extent of the reduction depends on local weather conditions. The methodology adopted in ...

Exentec offers equipment, support service and technical expertise to meet application needs in the design and manufacturing of high and low purity chemical distribution systems for the semiconductor, ...

We make mobile solar containers easy to transport, install and use. Make the next step towards renewable energy with our Solarcontainer! The challenges of our ...

Ready to Transition Beyond Diesel? Discover the next generation of mobile, autonomous clean power. MOBISMAART integrates solar, fuel cells, and batteries into hybrid systems that deliver where diesel ...

Solar-powered containerized distributors for chemical plants

Whether deployed as a standalone microgrid or part of a larger portfolio, our containerized systems ensure rapid installation, guaranteed reliability, and the ...
