I tried by fitting a Normally Open solenoid valve across the pump so that the system would revert to natural flow by convection preventing or lessening the stagnant water ...

Ideal for smart irrigation, industrial water pipelines, or remote HVAC systems, this valve ensures seamless automation. Pair its solar-powered autonomy with wireless connectivity to reduce ...

LEIT Controllers are an advanced "ambient light powered" water management irrigation control system. Power is derived by a time-tested, ...

Experience efficient water management with LoRaWAN ...

DIG offers a smart and sustainable solar powered irrigation timer with 3/4 in. anti-siphon valve, powered solely by ambient ...

Discover how a solar powered water valve delivers reliable, energy-efficient control for irrigation and home systems. Learn about its benefits, durability, and easy setup.

The solar water fountain equipped 4 different nozzles adjustable, which can adjust the water flow, spray height and jet shape by ...

The use of solar power in industrial and municipal valve actuator applications goes back several decades; however, technological advances in solar power efficiency and storage mean that ...

The LoRaWAN Solar Water Meter Valve combines a high-efficiency solar power system, precision water-flow sensor, and remotely actuated valve into one rugged device.

High quality solar power irrigation system with full port valve to increase water flow coefficient. Single-run control, cyclic control, timed programs, pivot irrigation, irrigation according to ...
