A solid is a substance that stays the same shape whether it is in a container or not. Solids turn to liquids at certain temperatures.

SOLID meaning: 1. hard or firm, keeping a clear shape: 2. completely hard or firm all through an object, or...
Learn more.

The meaning of SOLID is being without an internal cavity. How to use solid in a sentence.

Because its particles are packed close together, a solid is rigid, doesn't flow, and isn't easily compressed. A solid is defined as a state of matter with a definite shape and volume.

SOLID is the most immersive, collaborative and stimulating legal event series. Attend one, or all. Each one is different. SOLID brings together the top AI, Governance, Security, Privacy, eDiscovery, and ...

It comprises particles such as atoms, ions, or molecules, packed closely together and held in fixed positions by intermolecular forces. This tight arrangement gives solids a definite shape and volume ...
