In 2024, Rhode Island became the 12th state to establish an energy storage target with a goal of installing 90 MW of energy storage capacity by the ...

Gemini is the largest co-located solar plus battery energy storage project operating in the US, providing a consistent, dispatchable energy resource specifically ...

Battery energy storage has now entered center stage as a grid asset. The EIA expects 24.3 GW of new battery storage to come online in 2026, surpassing the 15 GW record set in 2025.

Illinois is set to issue procurements for 3 GW of battery storage, under a bill expected to be signed by Governor JB Pritzker. Transmission improvements to speed renewable deployment are ...

This table summarizes the VPP programs that include battery storage, and provides links to relevant program pages and documents. This table was last updated in February 2026.

Sunrun has forged a distributed power plant partnership with Pacific Gas and Electric Company (PG& E) using more than 1,000 customers' solar and storage systems to export energy to ...

There are over 1,400 major energy storage projects currently in the database, representing more than 116,300 MWh of capacity. The list shows that there are more than 195 GWdc ...

An overview of Energy Storage Targets across 50 U.S. States, with state-by-state policy progress, key resources, and model rules.

LPO can finance short and long duration energy storage projects to increase flexibility, stability, resilience, and reliability on a renewables-heavy grid.

State Grid Photovoltaic Energy Storage Project

The project consists of a 1,150 megawatt (MW) solar photovoltaic (PV) facility, an up to 4,600 megawatt-hour battery energy storage system (BESS), a 34.5-500 kilovolt (kV) grid step-up substation, a 15 ...
