The Edwards & Sanborn solar-plus-storage project in California is now fully online, with 875MWdc of solar PV and 3,287MWh of ...

Solar power makes up 51% of the planned 2026 capacity additions, followed by battery storage at 28% and wind at 14%. In 2025, 53 GW of new capacity was added to the ...

This corner of the desert is a hotbed not only for solar but also for wind energy. Rows of wind turbines, connected by both straight and ...

Meralco PowerGen Corporation The world's largest solar-plus-storage project has made a critical achievement that confirms system readiness and safe connection to the Luzon ...

Once built, DCEP will be the largest battery energy storage system in the world, highlighting California's leadership in clean energy innovation and infrastructure.

Google plans to deploy a 300 MW/30 GWh iron-air battery system in Minnesota under an agreement with Xcel Energy, pairing it with 1.6 GW of new wind and solar.

The world's largest floating solar farm is China's Anhui Fuyang Southern Wind-solar-storage, with an installed gross capacity of 650,000 ...

With a capacity of 3,000 MWh and 750 MW power, it is the largest active battery storage system in the world to date. The facility uses ...

Google announced this week it's developing a new data center complex south of Minneapolis to be powered by a practical utopia of clean energy: lots of wind, solar, and, ...

The largest wind solar and storage system

The United Arab Emirates is building the world's largest solar and battery storage project that will dispatch clean energy 24/7.
