Italy agreed Thursday to a Vatican plan to turn a 430-hectare (1,000-acre) field north of Rome, once the source of controversy between the two, into a vast solar farm.

The agreement stipulates that the development of the Santa Maria Galeria site will preserve the agricultural use of the land and minimize the ...

The world's smallest country just made a big move: Vatican City is now powered entirely by solar energy, setting an example for global climate action.

With the Apostolic Letter "Fratello sole," issued motu proprio, Pope Francis provides for the construction of an agrivoltaic plant in the extraterritorial ...

The agrivoltaic plant will make use of the Holy See's property at Santa Maria di Galeria. Located on the edge of Rome, the 424-hectare site houses the transmission facilities for Vatican ...

The project--which will produce solar energy while preserving the agricultural use of the 1,000-acre site--will be located at Santa Maria di Galeria. The agrivoltaic plant will provide energy for...

The Vatican is now completely powered by a farm that sports solar panels to help shade-tolerant crops thrive. This new coupling of solar and ...
