U.S. carmaker Tesla's new Megafactory in Shanghai, dedicated to manufacturing its energy-storage batteries, known as Megapacks, launched production on Tuesday, marking a ...

Explore how leading battery energy storage manufacturers are powering renewable energy, grid stability, and sustainability in 2025.

The complex will have two manufacturing facilities -- one dedicated to cylindrical batteries for EVs and another for lithium iron phosphate pouch-type ...

Below are ten of the most influential energy storage battery manufacturers worldwide, covering a wide range of applications from residential ...

In this article, we will explore five upcoming battery production factories set to open in the coming years.

China has connected to the grid a 100 MW hybrid energy storage facility that integrates supercapacitors and lithium-ion batteries, setting a new ...

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are ...

Energy storage developer and subsidiary of Canadian Solar, Recurrent Energy, has sold its 200MWh Fort Duncan battery energy storage system (BESS) project, ...

Covering about 200,000 square meters, the new energy storage project attracts a total investment of 1.45 billion yuan (\$200 million). Up to ...

Discover 10 new battery storage companies to watch in 2026 & find out how their solutions will impact your
