Three market reports released by the U.S. Department of Energy detail trends in wind development, technology, cost, and performance through the end of 2020 (and in offshore wind through May 2021). ...

New wind installations fell in 2021 as the industry faced a series of challenges, including supply chain headwinds, logistics logjams and international trade barriers, according to new analysis...

Wind and solar reached a 10.2% share of power generation in 2021, which was the first time wind and solar power exceeded more than 10% of ...

The global installed capacity of wind power plants (WPP) increased to 837 GW, i.e. by 93.6 gigawatts (GW) in 2021, as says the World Wind Energy ...

The world generated a record 10% of its electricity from wind and solar in 2021 and clean sources accounted for 38% of total power supply -- even more than coal.

Climate Central's new report, WeatherPower Year in Review, analyzes when and where the most wind and solar energy was produced in ...

Thus far, wind power's largest growth in capacity was in 2020, when 16,913 MW of wind power was installed. [7] Following behind it were 2021, during which ...

The largest wind project coming online in 2021 will be the 999-megawatt (MW) Traverse wind farm in Oklahoma. The 12-MW Coastal Virginia ...

In 2021, the top five regions in the wind power market are China, the United States of America, Germany, India, and the United Kingdom. The total wind power ...

USA Report 2021 In 2021, the Biden administration established a new target to deploy 30 gigawatts of

Wind power generation in 2021

ofshore wind power capacity by 2030. In this photo, a wind turbine installation vessel floats beside a ...
