Search specific patents by importing a CSV or list of patent publication or application numbers. The utility model relates to alternative energy.

This patent insight report on innovation trends in the offshore wind supply chain, jointly prepared by the European Patent Office (EPO) and the International Renewable Energy Agency (IRENA), assesses ...

The present invention provides a wind power generation device having, compared to conventional wind power generation devices, a higher degree of freedom in terms of installation ...

In the wind power generation system, when a wind speed and a wind direction suddenly fluctuate, a speed triangle around a windmill blade greatly deviates from a rating point, so that a separated flow ...

In one embodiment, an exemplary process includes detecting an icy condition on a wind turbine blade and causing at least a portion of the wind turbine blade to vibrate, causing the ice built up on the ...

Search for Wind Patents and Patent Applications (Class 290/55) Filed with the USPTO

The graph shows the distribution of patents among 26 fossil fuel technologies, which are broken down by sector (upstream, processing and downstream, ...

The study uses data from a newly constructed patent dataset (available online for complete download) covering twelve aspects of offshore wind technology, including foundations, ...

del has a significant effect in the identification of the leading technology. The results also explain the applicability of the PageRank algorithm and the five indicators a Keywords: Leading technology ...

The patent analytics dashboard provides relevant information on patents in the power industry based on

Wind power generation technology patent card

GlobalData's Patents database. It encompasses the global IP landscape, with focus on various major ...
