-----

Our timber frame solar canopy partner program is designed to provide a customizable panel mounting solution for solar companies and installers to offer to their client base.

Rolling your own solar installation probably doesn't involve manufacturing your own photovoltaic cells. But when it comes to making the ...

Does anyone have experience using wooden poles to mount vertical panels? I could frame the top as well, which might help a bit, but the panels themselves would end up having a ...

Loaded 3 solar panels + wood frame became quite heavy, and to hold it at an angle for a long time, I used really strong ...

Solar canopies, which are structures topped with solar panels, can be used as carports (and EV-charging stations), patio coverings, woodsheds, and places to house large equipment and/or ...

We use thick quality timbers to ensure your structure can support solar panels and remain structurally sound for the long term. It is the ...

Recent research has demonstrated the viability of prefabricated timber-framed facades with integrated PV modules, offering a seamless and ...

The challenge: finding a safe, incombustible insulation solution for membranes with laminated photovoltaic panels to be installed on wooden roofs. The solution: a ...
